

## Step 2: Environmental Review – Biodiversity Awareness Survey

## **Step 2: Environmental Review – Biodiversity Awareness Survey**

The pupils from 1<sup>st</sup> - 6<sup>th</sup> class filled out a biodiversity awareness survey again in November 2021. Check out the results above. Due to a lot of time missed over the course of the previous school years, not all areas saw an increase. We hope that all areas will continue to grow as we move forward.

### **Step 2: Environmental Review (Survey)**

150 pupils filled out a "What do you know?" questionnaire about minibeasts, trees, plants, animals and birds. The children had to try to identify each item of flora and fauna on the sheet. The results were interesting. Nobody could correctly identify each one. 66% of the answers were correct. Which is a small increase on last time.

### **Step 2: Environmental Review (Habitat Mapping)**

6<sup>th</sup> Class mapped out the grounds of the schools and the building, the yard, the court, the pitch, the garden, the prefab, and the wall. It's a bit tricky as there is building work currently taking place.
